PROFESSIONAL SUMMARY

Aspiring Software Engineer with hands-on experience in full-stack web development using Java, Spring Boot, React.js, MySQL, and RESTful APIs, gained through an internship at Mphasis Limited and academic projects. Skilled in developing scalable web applications, implementing JWT-based authentication, and building responsive user interfaces. Passionate about problem-solving, continuous learning, and contributing to innovative software solutions.

SKILLS

- Programming Languages: C, C++, SQL, Java, Python (Basic)
- Frontend: React.js, HTML5, CSS3, JavaScript, Vite
- Backend: Spring Boot 3.5, RESTful APIs, Microservices, JWT Authentication
- Database: MySQL
- Tools: Git, Postman, Thunder Client, GitHub, Maven
- Testing: JUnit
- Concepts: OOP, DBMS, SDLC
- Soft Skills: Communication, Teamwork, Problem-Solving

EXPERIENCE

Software Engineer Intern

Jan 2026 – Apr 2026

Mphasis Limited

- Developed a vendor-based cart module using React and Vite, featuring dynamic subservice listings, quantity controls, real-time price calculation, and checkout workflows
- Designed and implemented backend services using Spring Boot (Java) and MySQL to manage cart, booking, and feedback data, integrated with JWT-based authentication to secure API endpoints
- Built an end-to-end feedback and review module supporting star ratings, categorized feedback, comments, and photo uploads via Cloudinary integration
- Tested and validated REST APIs using Postman, ensuring reliable request/response handling across cart, booking, and feedback modules
- Collaborated with the team to design conditional UI logic and confirmation workflows, contributing to a smoother end-to-end booking and feedback experience

EDUCATION

Master of Computer Application (MCA)

2024 – 2026

Manipal Institute of Technology (MIT), MAHE

Bachelor of Science (B.Sc.) in Physics Model II (Computer Application)

2021 – 2024

Bharata Mata College, Thrikkakara, Mahatma Gandhi University

ACADEMIC PROJECTS

Indian Art and Culture: An Educational Web Application

- Technologies: React.js, Vite, Spring Boot 3.5, JWT, MySQL 8, Maven, Git, Postman

- Developed a full-stack educational web application for exploring India's art and cultural heritage through state-wise and region-wise content. Implemented JWT-based authentication, role-based access control, interactive quizzes, learning progress tracking, and RESTful APIs using Spring Boot microservices, with a responsive React.js frontend and MySQL database.

Computational Band Structure Analysis of MoS₂

- Technologies: Quantum ESPRESSO, BURAI GUI, Density Functional Theory (DFT), C2DB Database
- Developed a computational materials science project using Density Functional Theory (DFT) to analyze the electronic properties of materials. Performed SCF and band structure simulations in Quantum ESPRESSO through the BURAI graphical interface, utilizing material data from the C2DB database. Optimized computational parameters, generated electronic band structures, and interpreted simulation results for material property analysis.

CERTIFICATIONS

- Linear Algebra for Machine Learning and Data Science | Coursera – DeepLearning.AI
- Build Your First GUI App with Java | Coursera Project Network
- Python Programming | Course DCS Robotics
- Responsive Websites Basics: Code with HTML, CSS and JavaScript | Coursera – University of London

ACHIEVEMENTS

- 5th Rank holder for B.Sc. Physics Model II (Computer Application) | Mahatma Gandhi University
- Best Student Department of Physics Award 2024 (Bharata Matha College) | Mahatma Gandhi University
